Dear Mrs Dickinson

PM5253 – Strumpshaw Road, Brundall - drainage improvements

Following my previous correspondence in January, earlier this year, I am writing to confirm that the drainage works on Strumpshaw Road, Brundall, will start on Monday 2 October 2017 and are planned to take up to 10 weeks to complete.

We are making drainage improvements to reduce the likelihood of sections of Strumpshaw Road the road near the railway bridge flooding after heavy rain. The work will involve digging deep trenches to install a 300mm carrier drain.

Due to the excavation processes involved, and to maintain a safe working environment and protect the public, the road will need to be closed to through traffic. The closure to through traffic will be in place 24 hours a day / 7 days a week while the work is underway. Access to homes and businesses on the section of road where the work is taking place will be maintained at all times, however there may be some short delays.

Access to properties within the closure will be maintained for emergency services, and bus operators will be informed that the road will be closed to through traffic so they will be able to plan accordingly.

An official diversion route will be in place – please see attached plans showing the location of the work and the diversion route.

We will try to make sure any disruption is limited and thank people for their patience while we carry out this drainage improvement work.
